PGD-CET 2014 QUESTION BOOKLET

Overtion Deallet Version	PGD - CET - 2014 Roll No.	Overtion Dealtlet Co. No.
Question Booklet Version		Question Booklet Sr. No.
3 3 Thirty three	Answer Sheet No.	
(Write this number on your Answer Sheet)		(Write this number on your Answer Sheet)

Day and Date : Sunday, 5th January, 2014 Duration: 1 Hour 30 Minutes

Time: 10.00 a.m. to 11.30 a.m. Total Marks: 100

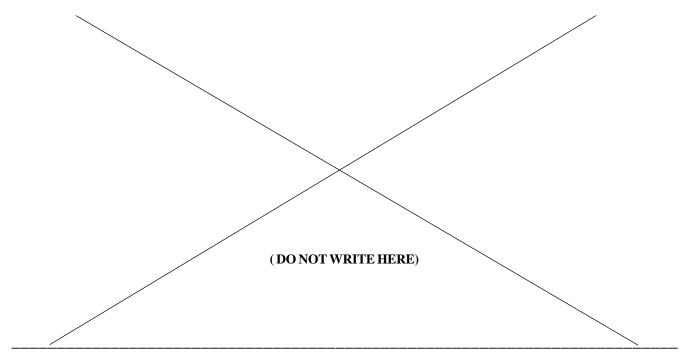

This is to certify that, the entries of PGD-CET Roll No. and Answer Sheet No. have been correctly written and verified.

Candidate's Signature

Invigilator's Signature

Instructions to Candidates

- 1. The Question Booklet has one seal sticker. Examinee should open the seal at 10.00 a.m.
- 2. This question booklet contains 100 Objective Type Questions (Single Best Response Type MCQ) in the subjects of BDS.
- 3. The **Question Paper** and **OMR** (**Optical Mark Reader**) **Answer Sheets** are issued to examinees separately at the beginning of the examination session.
- 4. Choice and sequence for attempting questions will be as per the convenience of the candidate.
- 5. Candidate should carefully read the instructions printed on the Question Booklet and Answer Sheet and make the correct entries on the Answer Sheet. As Answer Sheets are designed to suit the OPTICAL MARK READER (OMR) SYSTEM, special care should be taken to mark appropriate entries/answers correctly. Special care should be taken to fill QUESTION BOOKLET VERSION, SERIAL No. and PGD-CET Roll No. accurately. The correctness of entries has to be cross-checked by the invigilators. The candidate must sign on the Answer Sheet and Question Booklet.
- 6. Read each question carefully.
 - Determine ONE correct answer from out of the four available options given for each question.
 - All the candidates are instructed to carefully see in Question Booklet the Serial No. of MCQ and the sequence of options A), B), C) and D) in the MCQ while entering the answer in the Answer Sheet.
- 7. Fill the appropriate circle completely like this ●, for answering the particular question, with **Black ink Ball point pen only**, in the OMR Answer Sheet. Candidate should completely darken one and the only one best response (oval). Candidate should not use any other method for answering i.e. half circle, dot, tick mark, cross etc. as these may not be read by the scanner. Answer Sheet of each candidate will be evaluated by computerized scanning method only (Optical Mark Reader) and there will not be any manual checking during evaluation and verification.
- 8. Each answer with correct response shall be awarded one (1) mark. There is **No Negative Marking**. If the examinee has marked two or more answers or has done scratching and/or overwriting in the Answer Sheet in response to any question, or has marked the circles inappropriately, mark(s) shall NOT be awarded for such answer/s.
- 9. Use of whitener or any other material to erase/hide the circle once filled is not permitted. Avoid overwriting and/or striking of answers once marked.
- 10. Rough work should be done only on the blank space provided on the Question Booklet. **Rough work should not be done on the Answer Sheet.**
- 11. Confirm that both the candidate and invigilator have signed on question booklet and answersheet. Immediately after the prescribed examination time is over, the **Question Booklet and Answer Sheet are to be returned to the invigilator.**
- 12. No candidate is allowed to leave the examination hall till the examination session is over.

SPACE FOR ROUGH WORK

l.	Direct Coombs test detects	
	A) Antigen in serum	B) Antibodies on RBC surface
	C) Antigen on RBC surface	D) Antibodies in serum
2.	Invasive squamous cell carcinoma is oby	differentiated from Carcinoma in situ
	A) Penetration of basement membrane	
	B) Number of mitotic figures	
	C) Increased in size of cells	
	D) Nuclear pleomorphism	
3.	Leucopenia is seen in	
	A) Brucellosis	B) Acute myocardial infarction
	C) Typhoid	D) Diphtheria
4.	Clostridium tetani are following type of	of bacteria
	A) Spore bearing aerobes	B) Non sporing aerobes
	C) Spore bearing anaerobes	D) Non sporing anaerobes
5.	Common cause of diarrhoea in AIDS c	ases is due to
	A) Plasmodium falciparum	B) Cryptosporidium
	C) Ascaris lumbricoides	D) Taenia solium
5.	Process in which the hardness of a me	tal increases during cold working is
	A) Annealing	B) Coring
	C) Work hardening	D) Homogenizing
7.	Sharpey's fibres are seen in	
	A) Acellular extrinsic fibre cementum	
	B) Cellular intrinsic fibre cementum	
	C) Acellular fibrillar cementum	
	D) None of the above	

8.	Duct of Rivinus is associated with	
	A) Parotid gland	B) Submandibular gland
	C) Sublingual gland	D) Minor salivary gland
9.	At the age of nine years, the mandibul contact with which of the following tee	•
	A) First premolar	B) Second premolar
	C) Deciduous 2 nd molar	D) None
10.	The position of maximum intercuspation to as centric	on of upper and lower teeth is referred
	A) occlusion B) relation	C) position D) bite
11.	The Antiviral drug recommended for tr trigeminal nerve distribution in an imm	•
	A) Fomivirsen	B) Vidarabin
	C) Famciclovir	D) Entecavir
12.	Which of the following patient require	Vit B ₁₂ supplementation ?
	A) Patient on strict vegetarian diet	
	B) Patient with normal B ₁₂ level having	ng dementia
	C) Patient with elevated Homocystein	level
	D) General debility	
13.	Which of the most appropriate cause o	f urinary stone formation ?
	A) High urinary oxalate	B) Low urinary Mg
	C) Low urinary sodium	D) High urinary chloride
14.	Which of the following is NOT a chara	acteristic feature of sepsis ?
	A) Temparature > 38°C or < 36°C	B) Heart rate > 90/min
	C) WBC count $> 12000/\text{mm}^2$	D) Respiratory rate 14-18/min
15.	The following clinical presentation qua Malaria" <u>EXCEPT</u>	alify for the term "Severe Falciparum
	A) Severe anemia	B) Acidosis
	C) Pulmonary oedema	D) High grade fever with rigors

16.	Longer the duration of the disease, the	gre	ater is its	
	A) Incidence	B)	Both incidence	e & prevalence
	C) Prevalence	D)	None of the a	bove
17.	survey includes only the most and only one or two index ages.	imp	ortant subgrouj	ps in the population
	A) Pathfinder B) Pilot	C)	Urban	D) Rural
18.	The Index of Orthodontic Treatment to link dentofacial variation		· · · · · · · · · · · · · · · · · · ·	
	A) Brook and Shaw	B)	Burlington G	roup
	C) Locker et al	D)	Draker	
19.	Vitamin "D" is derived by radiation of	the	naturally occu	rring substance
	A) Calcitonin	B)	Cholecalcifer	ol
	C) Cholesterol	D)	Ergosterol	
20.	The growth in three dimensions get con	mpl	eted in which	order ?
	A) Width, length and height	B)	Height, width	and length
	C) Length, Height and width	D)	No specific or	rder
21.	Which of the following statements is c	orre	ect about lingua	al nerve ?
	A) It passes through infratemporal spa	ice		
	B) It passes through para-pharyngeal	spac	ee	
	C) It passes through the pterygomandi	ibul	ar space	
	D) The lingual nerve is the sensory tra	ct to	anterior one	third of the tongue
22.	Elephant foot deformity is indicative o	f		
	A) Diplopia			
	B) Non union of fractured edentulous	mai	ndible	
	C) Skeletal Class II malocclusion			
	D) Unilateral Le Fort I fracture of may	xilla		

23.	Pyramidal fracture is another name for	
	A) Le Fort I Fracture	B) Le Fort II Fracture
	C) Le Fort III Fracture	D) None of the above
24.	The cyst that remains behind in the jaw	s after removal of the tooth is
	A) Lateral Periodontal Cyst	B) Radicular Cyst
	C) Residual Cyst	D) None of the above
25.	Which of the following does NOT belon	g to amide group of local anesthetics?
	A) Mepivacaine B) Bupivacaine	C) Lidocaine D) Tetracaine
26.	Corrugated collagenous rings surround the walls of inflammatory cysts are cal	
	A) Ruston bodies	B) Hyaline bodies
	C) Howell- Jolly bodies	D) Papenheimer bodies
27.	Blue sclerae may be seen in all types or	f osteogenesis imperfecta EXCEPT
	A) Type I B) Type II	C) Type III D) Type IV
28.	A serious coagulopathy characterized haemorrhage due to platelet trapping w	• •
	A) Phace(S) Syndrome	B) Kasabach- Merrit Phenomenon
	C) Kaposi's sarcoma	D) Hemangioma
29.	In PRECEDE model of health education	n R stands for
	A) Resolution	B) Reinforcing
	C) Revolution	D) Reforming
30.	The fee level determined by the admin	istrator of dental benefit plan is
	A) Usual fee	B) Customary fee
	C) Reasonal fee	D) None of the above
31.	Which agent is used in walking bleach	technique ?
	A) Hydrofluoric acid	B) Carbamide peroxide
	C) Sodium perborate	D) Heinnes solution

7 32. Osteoblast covering the periodontal surface of the alveolar bone constitute a A) modified periosteum B) modified endosteum C) periosteum D) endosteum 33. Brushlite crystals in calculus are found more commonly in A) Mandibular posteriors B) Mandibular anteriors C) Maxillary anteriors D) Maxillary posteriors 34. Healing of a wound which simply restores the continuity of the diseased marginal gingival is known as A) regeneration B) new attachment C) repair D) reattachment 35. True about Papillon Leferve Syndrome is A) Autosomal dominant disorder B) Characterized by palmer planter hyperkeratosis C) Mutation in cathepsine C gene D) All of the above 36. Which of the following is an example of intraoral tracer? A) Height B) Philip C) Stansbery D) Messerman 37. Which of the following measures the vertical dimension when the mandible and muscles involved are in physiologic function of speech? A) Freeway space B) Leeway space C) Closest speaking space D) Primate space 38. To achieve the additional retention the following should be done while tooth preparation A) Excessive occlusal preparation B) Tapered preparation C) Grooves and boxes D) Supragingival finish line 39. Minimum solubility of dental cements to oral fluids is seen in A) GIC B) Zinc Polycarboxylate C) Zinc Phosphate D) Resin cement

40.	Eames technique is otherwise known	as
	A) No squeeze cloth technique	B) Increasing dryness technique
	C) Bloting mix	D) Mortar and pestle mix
41.	Excessive fixing of an x ray film	
	A) has no effect on image quality	B) causes brown staining
	C) reduces its density	D) increases its density
42.	Premature bone loss in primary teeth c	ould be seen in condition like
	A) Hypophosphatasia	B) Fibrous dysplasia
	C) Papillon Lefevere Syndrome	D) All of the above
43.	Which of the following may develop as	a result of juvenile diabetes mellitus?
	A) Ataxia B) Aphasia	C) Deafness D) Blindness
44.	Four film Survey (Series) for children occlusals along with	consists of maxillary and mandibular
	A) two maxillary posterior periapicals	
	B) two mandibular posterior periapica	ls
	C) two posterior bitewings	
	D) one panoramic & one lateral jaw vi	ews
45.	The isthmus width in class II cavity width of primary molars should not ex	•
	A) one fourth	B) two thirds
	C) one third	D) half
46.	Xylitol is a	
	A) natural sweet amino acid	B) synthetic sweet amino acid
	C) natural five carbon sugar	D) synthetic five carbon sugar
47.	Which is an example of retainerless m	atrix ?
	A) Universal matrix	B) Compound supported matrix
	C) Custom made matrix	D) Auto matrix

48.	Fluoride release is maximum in		
	A) Conventional Glass Ionomer	B) Metal modifie	d Glass Ionomer
	C) Resin modified Glass Ionomer	D) Polyacid mod	ified Composite
49.	The acid used in etching ceramic during	ng repair of cerami	c restorations is
	A) Hydrochloric acid	B) Hydrofluoric	acid
	C) Sulphuric acid	D) Ortho phospho	oric acid
50.	The configuration factor ["C" factor] f	or an occlusal clas	s I cavity is
	A) 2 B) 3	C) 4	D) 5
51.	The "Onset" of the disease in the history	ory of present illnes	ss relates to
	A) when the present complaint started		
	B) how the present complaint started		
	C) why the present complaint started		
	D) duration of the present complaint		
52.	A "Papule" is a		
	A) flat, solid lesion	B) raised solid le	esion
	C) raised blister	D) pus containing	g blister
53.	To study the malignant tumour of the j	aw bone, the radio	-nuclide used is
	A) Gallium 67 citrate		
	B) Technitium 99m labeled iodine		
	C) Technitium 99m per technitate		
	D) Technitium 99m methylene diphosp	phate (MDP)	
54.	Sphygmomanometer reading can be co	orrect only when	
	A) deflation is 5-10 mm Hg per heart beat		
	B) cuff is slightly full on applying to patient's arm		
	C) the cuff width is 25% of the diameter of the patient's arm		
	D) length of the bladder encircles 80% of the patient's arm		

55.	Radiographic image sharpness is reduced	ced	when	
	A) focal spot-to-object distance is less	S		
	B) focal spot-to-object distance is more	re		
	C) insufficient vertical angulation is u	ised		
	D) inappropriate horizontal angulation	ı is ı	used	
56.	. According to Stanford –Binet intelligence scale, the degree of mental disability with a range of 36-51 is termed as			of mental disability
	A) Severe	B)	Moderate	
	C) Profound	D)	Mild	
57.	Which of the following is NOT a type	of n	nixed dentition	analysis?
	A) Moyer's	B)	Tanaka Johns	ton
	C) Pont & Linderharth	D)	Hixon old fat	her
58.	Extra oral tracing method is grouped in relation for complete denture patients	in th	ne following fo	or recording centric
	A) Functional method	B)	Close mouth i	nethod
	C) Static method	D)	None of the a	bove
59.	When closure in intercuspal position is a stops for about msec before		_	
	A) 194 msec B) 94 msec	C)	394 msec	D) 594 msec
60.	Pontic design for anterior region should Asthetics.	d be	of the following	ng to give excellent
	A) Ridge lap B) Sanitary	C)	Ovate	D) Bullet
61.	Which of the following is <u>NOT</u> a layer	of	orimary growth	n cartilage ?
	A) Cartilaginous matrix	B)	Calcified cart	ilaginous matrix
	C) Fibrous capsule	D)	Degenerating	Chondroblast
62.	Early closure of suture is associated w	ith		
	A) Treacher Collins Syndrome	B)	Marfan Syndr	rome
	C) Guzons Syndrome	D)	Pierre Robin S	Syndrome

63.	The cartilage of the Hyoid arch is	
	A) Meckel's cartilage	B) Condylar cartilage
	C) Reichert's cartilage	D) Nasal cartilage
64.	Rotational changes in the mandible ess	sentially consist of
	A) Matrix rotation 25% & Intramatrix	rotation 75%
	B) Matrix rotation 50% & Intramatrix	rotation 50%
	C) Matrix rotation 100% & Intramatrix	x rotation 0%
	D) Matrix rotation 0% & Intramatrix re	otation 100%
65.	The maxillary intercanine dimension set which is known as	rves to control the mandibular growth,
	A) Mechano transduction	B) Safety valve mechanism
	C) Pterygoid response	D) Buccinator mechanism
66.	The mode of inheritance in hemophilia	is
	A) Autosomal dominant	B) Autosomal recessive
	C) X linked dominant	D) X linked recessive
67.	A strong crescent shaped fold of dura occupying great longitudinal fissure be	
	A) Falx cerebri	B) Diphragmatica sellae
	C) Tentorium cerebelli	D) Falx cerebelli
68.	Brodmann's area number 44 and 45 (I	Broca's area) is located on
	A) Medial surface	B) Inferior surface
	C) Superolateral surface	D) Temporal pole
69.	Which one of the following structures de	evelops from all the three germ layers?
	A) Soft palate	B) Mitral valve
	C) Tympanic membrane	D) Tooth
70.	Which cells clean the ultrafilter of rena	al corpuscle ?
	A) Mesangial	B) Podocytes
	C) Juxta-glomerular	D) Endothelial

71. The pulp stem cells are

A) Pluripotent in nature

B) Totipotent in nature

C) Multipotent in nature

D) None of the above

72. The incisal edge of maxillary central incisor in a 21 year old man is chipped off during a fall. He is informed that the tooth will erupt a little. This compensatory tooth movement is because of increased deposition of

A) dentin

B) pulp

C) cementum

D) periodontal ligament

73. Koilocytes are seen in all of the following EXCEPT

A) Condyloma acuminatum

B) Actinic keratosis

C) Verruca vulgaris

D) Squamous papilloma

74. A typical example of an immunologically mediated collagen vascular/connective tissue disorder is

A) Lichen planus

B) Pemphigus vulgaris

C) Lupus erythmatosus

D) Epidermolysis bullosa

75. Pastia's lines in Scarlet fever are

A) white lines on the dorsum of the tongue

B) seen bilaterally on buccal Mucosa

C) present in skin folds secondary to capillary fragility

D) seen when white and red strawberry tongue occur concomitantly

76. Degeneration of periodontal tissue without inflammation is called as

A) Desquamative gingivitis

B) Chronic periodontitis

C) Periodontosis

D) Pericoronitis

77. Keratin specific to epidermal type differentiation are

A) K_1, K_2, K_{10}, K_{12}

B) K_1, K_3, K_{10}, K_{12}

C) K_1, K_2, K_{10}, K_{13}

D) K₁, K₂, K₁₁, K₁₃

78.	. Which of the following is <u>NOT</u> detected by Evalusite?	
	A) A. actinomycetem Comitens	B) P. gingivalis
	C) P. intermedia	D) T. denticola
79.	Closed mouth technique of blocking lingual nerve is also termed as	the inferior alveolar, Buccinator and
	A) Gow-Gates Technique	B) Akinosi Technique
	C) Browns Technique	D) Bennetts Technique
80.	Penrose drain is	
	A) A simple rubber tube open at one e	nd
	B) Simple rubber tube open at both en	ds
	C) Modified corrugated rubber drain	
	D) Modified Foley's Catheter	
81.	The initiator in the heat cure polymer p	powder is
	A) Hydroquinone	B) Sulfinic acid
	C) Benzoyl peroxide	D) Sulfur dioxide
82.	A dentist can best control the setting without altering its properties by	time of Alginate impression material
	A) using perforated tray	
	B) altering water: powder ratio	
	C) reducing the rate of mixing	
	D) altering the temperature of water	
83.	In acrylic restorative materials, the pu and exuding fluids is termed as	mping action of alternately imbibing
	A) Imbibition B) Percolation	C) Syneresis D) Evaporation
84.	Time dependent deformation produced a constant stress is termed as	in a completely set solid subjected to
	A) Static creep	B) Elongation
	C) Dynamic creep	D) Flexibility

An acidic agent that dissolves the inorganic structure in dentin that allo infiltration of adhesive resin is	
A) Dentin bonding agent	B) Dentin conditioner
C) Primer	D) None of the above
Benzodiazepines act preferentially on wand mental functions?	which part of the brain to block thought
A) Hypothalamus	B) Thalamus
C) Limbic system	D) Area Postrema
The pathological state that alters the vo	olume of distribution of many drugs is
A) Septicemia	B) Duodenal ulcers
C) Congestive heart failure	D) Hypertension
Which of the following analgesic is use concentration in synovial fluid than pla	
A) Ibuprofen	B) Diclofenac
C) Tenoxicam	D) Piroxicam
C) Tenoxicam The antiulcer agent detaches and kills Hais	•
The antiulcer agent detaches and kills H.	•
The antiulcer agent detaches and kills H. is	. Pylori organism and prevents relapses
The antiulcer agent detaches and kills H. is A) Colloidal Bismuth	Pylori organism and prevents relapsesB) PirenzipineD) Sucralfate
The antiulcer agent detaches and kills Hais A) Colloidal Bismuth C) Misoprostol The dentin desensitizing agents that act	Pylori organism and prevents relapsesB) PirenzipineD) Sucralfate
The antiulcer agent detaches and kills Hais A) Colloidal Bismuth C) Misoprostol The dentin desensitizing agents that act tubular fluid is	a. Pylori organism and prevents relapsesb. B) Pirenzipinec. D) Sucralfated. Sucralfated.
The antiulcer agent detaches and kills H. is A) Colloidal Bismuth C) Misoprostol The dentin desensitizing agents that act tubular fluid is A) Strontium Chloride	B) Pirenzipine D) Sucralfate ts by precipitating proteins in dentinal B) Potassium oxalate D) Hydroxy ethyl methacrylate
The antiulcer agent detaches and kills H. is A) Colloidal Bismuth C) Misoprostol The dentin desensitizing agents that act tubular fluid is A) Strontium Chloride C) Fluoride	B) Pirenzipine D) Sucralfate ts by precipitating proteins in dentinal B) Potassium oxalate D) Hydroxy ethyl methacrylate
The antiulcer agent detaches and kills Hais A) Colloidal Bismuth C) Misoprostol The dentin desensitizing agents that act tubular fluid is A) Strontium Chloride C) Fluoride The concept of field change or "Cancer	B) Pirenzipine D) Sucralfate ts by precipitating proteins in dentinal B) Potassium oxalate D) Hydroxy ethyl methacrylate erization" was proposed by
The antiulcer agent detaches and kills Hais A) Colloidal Bismuth C) Misoprostol The dentin desensitizing agents that act tubular fluid is A) Strontium Chloride C) Fluoride The concept of field change or "Cance A) Pirani	B) Pirenzipine D) Sucralfate ts by precipitating proteins in dentinal B) Potassium oxalate D) Hydroxy ethyl methacrylate erization" was proposed by B) Dimeglio D) Slaughter
The antiulcer agent detaches and kills Hais A) Colloidal Bismuth C) Misoprostol The dentin desensitizing agents that act tubular fluid is A) Strontium Chloride C) Fluoride The concept of field change or "Cance A) Pirani C) Paterson	B) Pirenzipine D) Sucralfate ts by precipitating proteins in dentinal B) Potassium oxalate D) Hydroxy ethyl methacrylate erization" was proposed by B) Dimeglio D) Slaughter
	infiltration of adhesive resin is A) Dentin bonding agent C) Primer Benzodiazepines act preferentially on wand mental functions? A) Hypothalamus C) Limbic system The pathological state that alters the vol. A) Septicemia C) Congestive heart failure Which of the following analgesic is us concentration in synovial fluid than plantages.

93.	The following wound is not untidy	
	A) Incised wound	B) Crushed wound
	C) Avulsed wound	D) Lacerated wound
94.	Most common cause of primary hyper	parathyroidism is
	A) Adenoma	B) Ectopic ACTH secretion
	C) Hyperplasia of 4 glands	D) Idiopathic
95.	Branchial fistula is persistent of	
	A) First branchial cleft	B) First branchial arch
	C) Second branchial cleft	D) Second branchial arch
96.	Circulatory shock is an example of	
	A) Hypoxic Hypoxia	B) Stagnant Hypoxia
	C) Histotoxic Hypoxia	D) Anemic Hypoxia
97.	The amount of air remaining in the lur	ngs after a normal expiration is
	A) Tidal volume	B) Functional residual capacity
	C) Vital capacity	D) Total lung capacity
98.	Hemiplegia is produced when the cort of	icospinal tract is damaged at the level
	A) Pons	B) Midbrain
	C) Medulla	D) Internal capsule
99.	Positive nitrogen balance is seen in	
	A) Malignancy	B) Pregnancy
	C) Uncontrolled Diabetes mellitus	D) Burns
100.	Substrate for gluconeogenesis is	
	A) Glycogen	B) Acetyl CoA
	C) Glycerol	D) Leucine
