ANNEXURE-III INFORMATION ON COMPUTER BASED TESTS

What kind of examination will it be?

A Computer-Based test consisting of multiple choice questions is conducted in English (see examples at the end). Each question will have five possible answers. Your task will be to select the one best answer to each question. There will be **ONLY ONE CORRECT ANSWER** to each question. For the degree courses (MBBS, BSc Nursing & Allied Health Science Degree Courses) there are 60 questions each in Physics, Chemistry and Biology (120 minutes total time). This is followed by 120 questions in General Ability including Speed and Accuracy and also a few questions on issues of current topical interest. **The 120 questions in General Ability will be in two sections. Section I will have 60 questions to be answered in 50 minutes and Section II will have 60 questions to be answered in 20 minutes.** The duration of the whole examination will be 3 hours and 10 minutes.

For the Diploma courses, the examination consists of 25 questions each in Physics, Chemistry, Biology and 15 questions in General ability. The duration of the exam will be 90 minutes.

For other courses where a background in science is not required, the non-science paper will have 90 questions including English, General Ability, speed and accuracy and a few questions on issues of current topical interest. The duration of the exam will be 90 minutes.

For courses which require a special paper, there will be 90 questions pertaining to that particular subject. The duration of the exam will be 90 minutes.

Do not bring any other papers except your Hall Ticket. You are not allowed to carry any of your belongings inside the exam centre including mobile phones, pagers, palm tops, blue tooth devices, digital watches with built-in-calculators or any electronic devices which have the potential for misuse or unauthorized communication during the examination. In case of any unforeseen circumstances the Exam City can be cancelled at any point of time and a new Exam City can be allotted en bloc with due intimation in newspapers / website.

CMC reserves the right to reschedule the date / time of the exam.

How should I answer the Computer Based Test?

You can familiarize yourself to the computer based test by answering the **sample mock test that will be made available on the CMC Vellore website after 20th March 2014.**

Every question is followed by 5 answer options. Choose the option that is most appropriate. Indicate your answer by clicking on the shape (■) adjacent to the option you think is correct. **Click ‘save and next’ button in the bottom of the screen to save your answer and go to the next question.**

You can go directly to any question by clicking on the question number which will appear at the right side of the screen. **Click ‘save and next’ button in the bottom of the screen to save your answer and go to the next question.** The answered question number will be marked green and the unanswered/ skipped question number will appear red. Questions not visited will appear light grey.

If you are doubtful of the answer, you can mark the question for review by clicking on the **‘Mark for review and next’** button. This will be indicated by the question number changing to purple. If a question is answered and also marked for review, **your answer for that question will be considered in the evaluation.**

If you want to change your answer to any question, you may select the question and change the answer by clicking on the appropriate answer. **Click ‘save and next’ button in the bottom of the screen to save your answer and go to the next question.**

If you want to leave an answered question blank, click on the ‘Clear response’ button on the bottom of the screen.

The countdown timer in the top right corner of the screen will display the remaining time available to you to complete the test. When the timer reaches zero, the test will end by itself. You will not be required to end or submit your test.

You can view all the questions by clicking on the **Question Paper** button.

How fast should I work?

Although most of the tests stress on accuracy more than speed, it is important for you to use your time as economically as possible. **Work steadily and as fast as you can, but with care.**

Do not worry if you cannot answer all the questions. No one is expected to know the answers to all the

questions. Do not waste time on questions that are too difficult for you but go on to the other questions and come back to the difficult ones later.

Should I Guess? Is there negative marking?

Since the possible answers for each question are provided, you may wonder whether or not to guess the answer for questions you are not certain about. **There is no negative marking** and hence at times it may be worthwhile making an intelligent guess. That choice is yours and you have to decide how close to the options you are.

In the entrance test for degree courses (MBBS, Nursing, AHS degree courses), credit is given for **questions not attempted** (those left blank). The **credit given** is equal to 1/5 (**0.2**) of the mark for that question. So your score will probably be more if you leave out the questions about which you know nothing. Remember, however, that a **correct answer** will be given **one full mark**. So if you have some knowledge of the question, and are able to eliminate one or more of the possible answers, your chances of guessing the correct answer increases. It may be to your advantage to attempt such questions.

How should I prepare for these tests?

These tests have been designed to measure your knowledge, understanding and ability and not just your memory. It will help to review your science course carefully, making sure that you UNDERSTAND each subject thoroughly.

Some sample questions from each of the various tests are given below. These cover most of the types of questions that will be asked. However there may be some other varieties also. You will have approximately **half-a-minute to answer each question. Familiarize yourself with the model questions given below and with the mock test that will be made available on the CMC Vellore website after 20th March 2014.**

What is the syllabus?

The syllabus for the common entrance tests (unless otherwise specified) will be a mixture of 'plus two' level boards recognised by the TN Dr MGR Medical University. Papers will be in Physics, Chemistry, Biology and General Ability including Speed and Accuracy and a few questions on current topical interest. Wherever there is a special paper for a particular course, the questions will be related to that subject. Please see the course description in the prospectus.

What will I need at the examination?

You should have your Hall Ticket with you. Take with you two pencils. This is all that you will need for the examination.

You will NOT be permitted to take rough paper, scales, calculators, logarithm tables, drawing instruments, or MOBILE PHONES into the examination hall, as they are NOT needed.

How are selections made?

Soon after the examination, dummy numbers are assigned to each candidate and all further corrections and computations are done anonymously. After correction, the marks are converted to stanine grades and a final grade is worked out. Selection to the Step-2 is done purely on the basis of inter-se merit. The interviews and other special tests focus on evaluating the person and his/her aptitude for the course.
